

ANPR

Security that works....

Cloudpass is a market leading provider of Automatic Number Plate Recognition (ANPR) solutions. Our cloud-based system allows for complete control of your car park from anywhere in the world whether this is a single office car park or multiple car parks across large distances.

Our systems have been designed with scalability, resilience and security in mind. We give you the tools to manage your site effectively and efficiently reducing cost by allowing staff to focus on the more important day to day tasks.

Self enrolment for easy access, grant access on a user by user case with time restrictions and visitor / delivery management.

Cloud distribution allows for multi site — multi tenant access.

Easy reporting with real time statistics featuring customisable reporting.

Bespoke : Our ANPR solutions are designed to be easily customisable to ensure your solution is tailored to your business.

Secure : Designed to be used in high traffic environments we guarantee our solutions will be fit for purpose and ensure high levels of security.

Cost-effective : We have spent years building relationships with our suppliers to be able to offer you the best rate. Our savings do not mean we compromise on the equipment used.

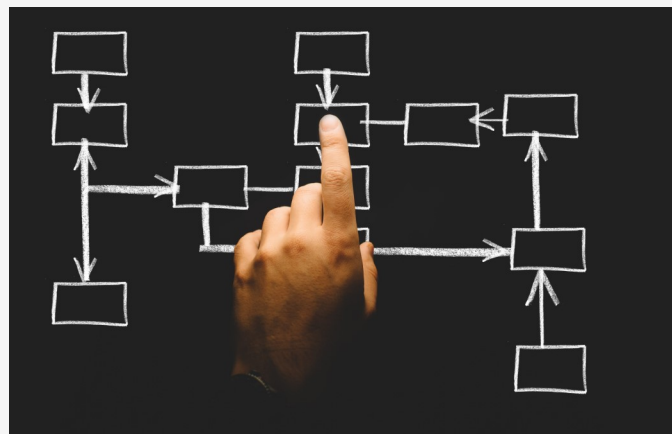

Time Saving : The Cloudpass ANPR solution saves your business time and money by reducing the abuse on your site.

OUR APPROACH

We offer comprehensive full-scale solutions from Design and software implementation to installation and after sale care. Our team of dedicated engineers will work with you every step of the way to ensure the product you receive is to your satisfaction and fit for purpose.

The focus of Cloudpass is to provide the best quality software and hardware. Our systems are designed with our customers in mind offering bespoke solutions to all your requirements ensuring that your revenue streams are not reduced by abuse. This gives you peace of mind to focus solely on the things that really matter to your business.

We pride ourselves on security, that is why we provide the latest technologies that are approved by the security industry. When selecting our partners we use extensive testing to ensure it is fit for purpose. Our team of skilled developers continue to improve and enhance our platform to ensure we stay competitive and leaders in our market.
