

WORKFORCE MANAGEMENT

Great businesses powered by great people....

The Cloudpass workforce management system is highly bespoke and ensures complete visibility over your workforce. With added accountability our software ensures your workforce follows the guidelines of your site to give added security and safety with features such as CITB checks against your workforce to guarantee regulations are being followed.

Our software is designed with our customers in mind offering bespoke and custom reporting to ensure you as a customer get the information that is required in a quick and formatted way - saving administration time and improving the reliability of the data you receive

An easy to use system that checks an individual's credentials against multiple data sources.

Realtime statistics and reports available from our intuitive dashboard.

Easy reporting with real time statistics. Customisable reporting for time and attendance.

Bespoke : The Cloudpass workforce management can be customized specifically for your business from additional feature request to bespoke reports for easy to view data.

Secure : Secure your site by ensuring the workforce are qualified and covered by regulations.

Accountability : Cloudpass Workforce management forces accountability of staff using different forms of access control like biometrics, pin pads and more.

Time Saving : Save time by removing the need for administration task to be carried out - our system allows your staff to work on the important things.

OUR APPROACH

We offer comprehensive full-scale solutions from Design and software implementation to installation and after sale care. Our team of dedicated engineers will work with you every step of the way to ensure the product you receive is to your satisfaction and fit for purpose.

Our developers are dedicated to creating the best cloud based software on the market, enabling us to deliver flexible and adaptive software taking advantage of the latest technologies. This allows us to be at the forefront of our industry whilst being bespoke and customer focused.

We take advantage of our partnerships by embracing the latest technologies - using the Microsoft Azure cloud we ensure our applications are scalable and have built in redundancy to ensure minimal down time.
